Repair
- Replace the clutch kit.
- Realign the engine and the gear box.
- Replace the pilot bearing.

Caution
- Be careful in selecting the gears and do not over run the clutch.

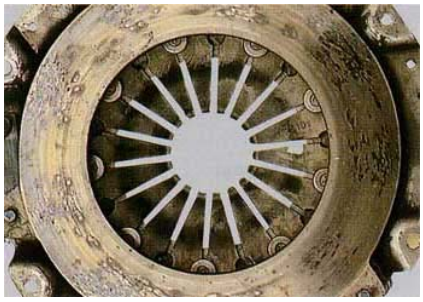

Unusual worn out on the fingers area

Cause
- Incorrect release bearing travel.
- The clutch operating system is badly adjusted or defected.
- The level of pre-load on the release gearing is incorrect.

Repair
- "Adjust the clutch operating system (pedal height, self adjusting system, clutch linkage....)."
- Check the pre-load on the release bearing.

Burn marks on the pressure plate

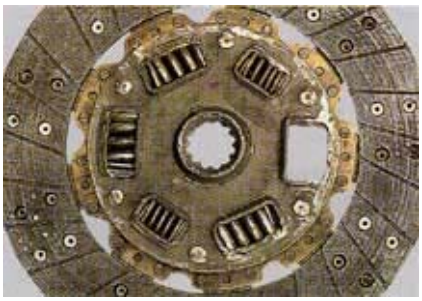

Cause
- Oil or grease contamination on the clutch linings or on the pressure plate.

Repair
- Locate and repair all sources of contamination.
- Replace the clutch kit.

Caution
- Apply the correct quantity of grease on the clutch disc splines and the input shaft do not use contaminated pair of gloves.

The torsion spring area of the disc plate is broken

Cause
- Over torque applied to the clutch disc.

Caution
- Do not use engine brake excessively.
- Be dareful in selecting the gears and do not over run the clutch.

Unusual worn out on the torsion spring area

Cause
- Over torque applied the clutch disc.

Contact area of the diaphragm spring with the release bearing excessively worn out

Cause
- Off centering of the release bearing or mis-alignment of the main shaft.

Repair
- Replace the release bearing.
- Realign the engine and the gear box.

TROUBLE SHOOTING MANUAL OF CLUTCH SYSTEM

Damper shpring broken away

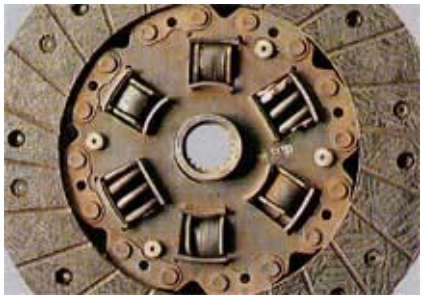

Cause
- Wrong clutch cover size used.
- Excessive release travel.
- The clutch disc is installed on the wrong side.

Repair
- Replace the flywheel.
- "Adjust the clutch operating system (pedal height, self adjusting system, clutch linkage...)."
- Install the clutch disc properly.

Caution
- Make sure that the correct kit is used on the application.

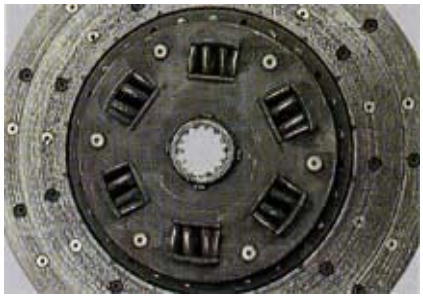

Deformation of the clutch disc

Cause
- Deformed during delivery or handling.
- "Deformed during installation (weight of the gear box, dropped)."
- Deformation due to overheating during slippage.

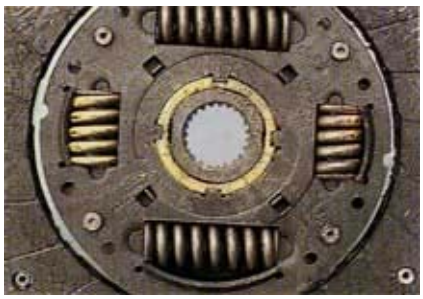

Caution
- Handle with care.
- Do not place the clutch disc under a weight.

Clutch facing completely worn

Cause
- Use over product lifetime.
- Prolonged clutch slippage due to a malfunction or extremely severe use.
- Disc not changed during a previous flywheel / cover replacement.

Clutch lining contaminated with oil or grease

Cause
- Excessive greasing of the spline hub when installed.
- Oil leakage from engine or gear box.

Repair
- Replace the clutch disc.
- Locate and repair all sources of contamination.

Caution
- Apply the correct amount of grease on the clutch disc splines and the input shaft.

Burn marks on the flywheel

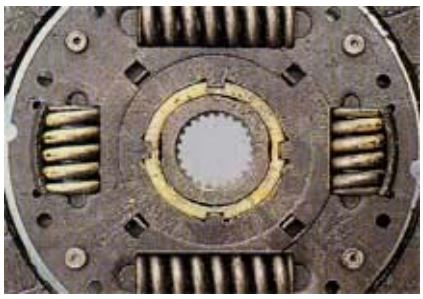

Cause
- Excessive greasing of the spline hub when installed.

Repair
- Clean the flywheel and replace the clutch disc.

Caution
- Apply the correct amount of grease on the clutch disc splines and the input shaft.

Grease splashed over from the spline hub

Cause
- Excessive greasing of the spline hub when installed.

Caution
- Apply the correct amount of grease on the clutch disc splines and the input shaft.

TROUBLE SHOOTING MANUAL OF CLUTCH SYSTEM

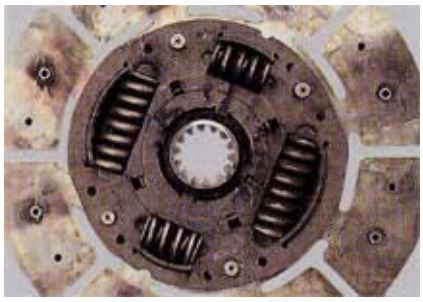

Burn marks on the pressure plate

Cause
- Oil or grease contamination on the clutch linings.
- The clutch operating system is badly adjusted or defective.
- Driver's foot resting on the clutch pedal.

Caution
- Do not use contaminated pair of gloves.
- Do not install a deformed clutch disc.

Clutch linings are burned

Cause
- Oil or grease contamination on the clutch linings.
- "Slippage due to a worn clutch disc or flywheel, lack of clamp load from the clutch cover."
- Aggressive driving.

Caution
- Prevent the contamination of the clutch linings.

Pressure plate broken

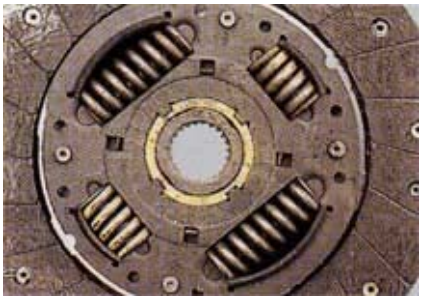

Cause
- Excessive slipping as resulting in overheating of the pressure plate.

Repair
- Replace the clutch cover.

Caution
- "Overheating is due to aggressive driving, using semi clutch operation, driving the foot."
- Resting on the clutch pedal.

Clutch lining worn out unevently

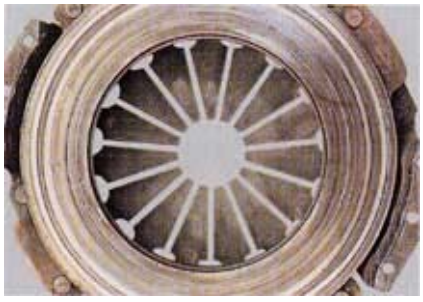

Cause
- Flywheel badly machined.
- The clutch disc run out is out of specification.

Repair
- Replace the clutch disc.
- Replace or machine evenly the flywheel.

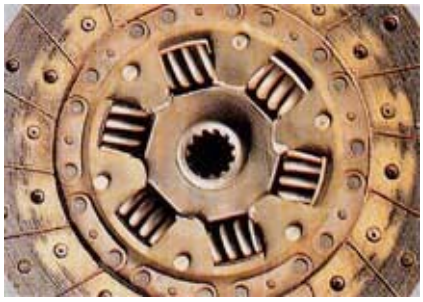

Caution
- Over stack and long term storage.

Circular grooves appearing on the pressure plate

Cause
- "Linings worn out, heads of the facing rivets are in contact with the pressure plate."

Clutch disc plate broken

Cause
- Defective clutch installed or wrong direction for installation.

Caution
- Make sure that the correct kit is used on the application.

TROUBLE SHOOTING MANUAL OF CLUTCH SYSTEM

Clutch lining damaged

Cause
- Excessive slippage due to aggressive driving or overloading.
- The clutch operating system is badly adjusted or defective.

Repair
- Replace the clutch set.
- Replace or machine evenly the flywheel.

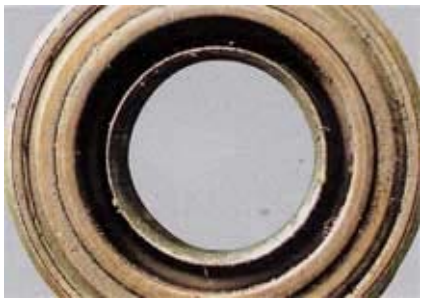

Flywheel cracked or worn out

Cause
- Flywheel Is excessively worn.
- Cracks created by overheating.

Repair
- Replace or machine the flywheel.

Release bearing damaged

Cause
- Seal torn.
- Overheating during slippage.
- Leakage of the grease.

Clutch disc plate broken

Cause
- Wrong product Installed.

Caution
- Check the direction of the clutch disc when Installed.

The contact point of the fork is worn out, the fork is off-centered

Cause
- The fork is out of shape.

Caution
- Replace by a genuine release fork.

Cause
• Improper use.

The contact point of the fork is worn out, the fork is off-centered

Cause
• The fork is out of shape.

Repair
• Replace by a genuine release fork.

Clutch disc components damaged by over torque

Cause
• Excessive engine brake operation.
• Incorrect disc for the application.
• Aggressive starting operation.
• The clutch operating system is badly adjusted or defective (clutch pedal).

Repair
• Replace the clutch disc.

The drive straps of the clutch cover are damaged

Cause
• Dropped during installation.
• Overload.
• Using improper product.
• Improper gear selection (ex: from 5th to 1st).

Repair
• Replace the clutch disc.
• Careful handling.
• Operate to normal conditions.

Clutch disc hub splines are damaged

Cause
• "Linings worn out, heads of the facing rivets are in contact with the pressure plate."

Repair
• Replace the T/M.
• Replace the clutch disc.

Caution
• Make sure that the splines properly match up.
